

## Dear Human!

No matter what race, gender, culture, social status, education or religion you are. Right now, at this very second, you are a small god who can make a difference and change the ecology of our planet.

**The mankind is killing the life basis on our planet.** Whole biological systems have already perished so 9 of 10 people are now breathing polluted air. More than 7 Million people die prematurely, being exposed to toxic substances in air and water. Cancer has become the leading cause of death worldwide. These are only official numbers – the reality is for sure a way more dramatic and numbers increase daily. This problem is touching every single terrestrial being.

**But nobody is seriously dealing with saving the ecosystem** on global level – everybody is talking about lowering pollution and nobody talks about stopping polluting and dealing with it. Why? Because it is very expensive and each country's zone of influence ends at the boarder – however the problem is truly global. **And still there is a solution!**

**ADGEX is a developer of game-changing ecological solutions**, capable of solving the problem. The most important thing is that these solutions are profitable. This is important as large-scale projects can't be run on deficit basis for long time. This means that **saving our planet becomes a business** – not for global corporations but **for every single person**.

Our plan is to unite people **worldwide** in a **movement called SustainableMe**. This would be a real platform for saving the planet. Because every participant will make a profit. Our first **viable project is to set-up a fleet of vessels that will start cleaning the ocean from plastic waste**.

**Today we are not asking for money.** We do ask you for something invaluable – Your Time, Your Name and Your Support. Why? Because a big idea needs an ambassador who would introduce it to the world.

We invite you to become the “Donor” of the **SustainableMe** Program to combine our possibilities and make the world a greener place to live.

**Live without “Later”! YOU are THE LITTLE GOD to change the “Now”!**

Cordially yours,  
ADGEX Team

*P.S. Find out more about **SustainableMe** and become the Ambassador of our movement at our website <https://www.adgex.com/sustainableMe> or just email us at [SustainableMe@adgex.com](mailto:SustainableMe@adgex.com)*
